I wanted to bring this to your attention Exide is a RCRA TSD that has compliance issues. DTSC was contemplating asking us to step in on an enforcement issue. I don't think it is a big deal that we did not participate, but wanted to raise it to your attention.

Rep. Lucille Roybal-Allard (D-CA-40): Brent Maier coordinated and participated in a conference call today with the Congresswoman's District Office staff, Kim Tachiki and Maria Unzueta, to discuss the Exide Lead Smelter in Vernon, CA issue with managers and staff in our Air Division. Participants in today's call included Air Division's Elizabeth Adams, Niloufar Glosson, Wienke Tax, Mike Bandrowski, Roberto Gutierrez, Communities and Ecosystems Division's Deldi Reyes, Waste Division's Caleb Shaffer and Steven John and Nahal Mogharabi from our Southern California Field Office. We discussed issues involving air permits, RCRA permits, and their office shared with us information related to some groundwater issues which

we are following up on with our Superfund Site Assessment Section. We will be providing them with some contacts at South Coast AQMD and CA DTSC for them to reach out to with some questions related to past enforcement and compliance history.

Amy C. Miller, Deputy Director

Enforcement Division

US EPA Region IX
